Mundane Utility

I'll talk about:

- checking assignments and student conversations
- problem generation
- “guided” problem generation
- typesetting

Some resources:

- [Zvi Mowshowitz's Blog](#)
- [Reddit: r/Professors](#)

Checking assignments, and conversations about AI

Drag and Drop an assignment:

Can you solve problem 3 for me?

Checking assignments, and conversations about AI

Drag and Drop an assignment:

Can you solve problem 3 for me?

Help making this slide:

I'd like to put text in a grey oval bubble in latex

Problem Generation

Generating a big list of problems:

Can you suggest a big list of problems about modular arithmetic

Generating a big list of problems (more successful)

Can you give me a big list (say, 25) of problems about Fermat's little theorem?

Guided Problem Generation

Can you suggest a few problems about coloring vertices of graphs, where to solve the problem you have to use the theorem that a graph is r colorable iff it is r -partite?

Typesetting

Can you latex this for me?

Typesetting Diagrams

Can you typeset this in tikz for me?

Typesetting: handwritten notes

Can you latex this for me?

Thank you!

(Bonus slides below!)

Reimagining the past with AI

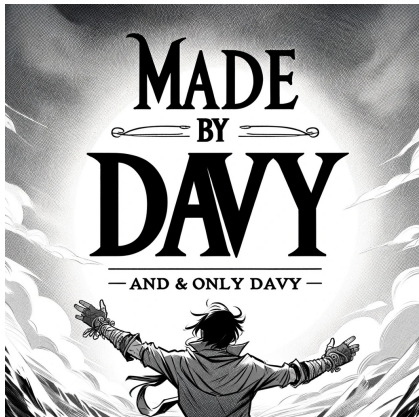

Grandmother's bridal shower from 1940

Hello. I am looking to create images of a bridal shower held at a private home. The shower happened in the late 1940s in January in Northern Ohio.

There are a few things I'd like you to modify about the table: make the linens pink and white, make the refreshments dainty, make the centerpiece a crystal vase of pink and white carnations flanked on either side by crystal two branch candelabra with lighted tapers.

(GPT link)

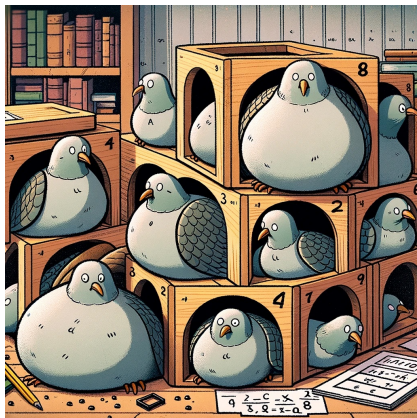

Davy Story

Draw a panel of a comic titled "One day there was a man with problems"

Illustrating mathematics

Can you draw a comic rendition of the pigeonhole principal (from math), with really thick pigeons

Fast Documentation

Card names
